Experience

Digitech Evoqe Aug 2026 – Present
AI Full-Stack Engineer (sister company of ZaryahX) *Chennai, India*

- Continued as a core engineer on **ZaryahPlus** (zaryahplus.com): rebuilt marriage matching to spec, shipped community gatherings end to end and extended the Finance module.
- Built an **Islamic finance intelligence platform** inside ZaryahPlus: AAOIFI Shari'ah screening and contract checks, with AI coworkers acting only through an audit-logged OPA/Rego policy gateway (FastAPI, pgvector, Next.js).
- Designed and built a **multi-tenant WhatsApp AI work assistant** for a client (TypeScript, Node, PostgreSQL): per-tenant keys, owner-approved actions, prompt-injection defences, encrypted backups; load-tested at nearly 2,000 msg/s.
- Built **domain-specific small language models** for regulated domains: hybrid RAG, QLoRA fine-tuning, LLM-as-judge evaluation and an automated release gate on safety and citation accuracy.
- Built the server core of an **on-premise multi-agent work coordinator** (signed requests, RBAC, encrypted backups); shipped RAG-agent features for an education SaaS; led an AI-assisted QA and security audit of a coding platform.

ZaryahX May 2026 – Jul 2026
AI Intern, ZaryahPlus *Chennai, India*

- Built ZaryahPlus's **Telegram assistant** end to end: streamed replies from the Raya AI companion, group tasks with reminders, voice and document understanding, and a security audit that closed a critical token leak.
- Built the **Finance module** end to end: Shari'ah-compliant stock screener, live prices and intraday charts, and portfolio simulation behind a fail-closed compliance gate (React/TypeScript, FastAPI).
- Hardened **LLM guardrails**: output-side moderation, jailbreak fixes, Arabic/Urdu script handling, crisis helplines by country and gating of unprotected LLM endpoints, over a multi-provider LLM fallback chain.

Ifelse Techsmart Solutions Jun 2025 – Jul 2025
Full-Stack Intern *Chennai, India*

- Built most core features of the OnfraBizo web app (React, Node.js/Express): auth, analytics dashboard, contact management, image handling.

Projects

FPL Auto-Manager / *Python, LightGBM, PuLP, GitHub Actions, Telegram* 2026

- Fantasy Premier League bot that predicts player points and plans transfers, captain and chips with integer programming; runs hourly on GitHub Actions and posts advice to Telegram. Beat FPL's official predictions in a season replay.

Football xG Lab & Scout / *Python, LightGBM, Streamlit* live demo

- Expected-goals model on free StatsBomb data that matches StatsBomb's commercial model on World Cup 2022, Euro 2024 and Copa América 2024, plus a similar-player finder; both live with daily data pipelines.

UAE Public-Interest AI Agents / *Python, Claude tool use, Flask* 2026

- Five Claude agents (job scams, end-of-service pay, tenant rights, SME compliance, schools): rule engines decide verdicts, the LLM explains and drafts, a human approves every send. Dubai Chamber AI Agents Championship entry in progress.

Kaggle Competitions / *PyTorch, LLM agents, reinforcement learning* 2026

- **RSNA knee imaging:** top 13% (799 of 6,299). **Pokémon TCG AI Battle:** top 16% (1,085 of 6,807) with search agents and a learned move ranker, then a PPO self-play agent. **ARC-AGI-3:** LLM agent for interactive reasoning games.

Education

Vellore Institute of Technology, Chennai / *B.Tech CSE* / *CGPA 8.1/10* Sep 2022 – May 2026

Skills & Certifications

AI / LLM: agents and tool use, RAG (Pinecone, pgvector, bge-m3), guardrails, LLM-as-judge evals, QLoRA fine-tuning (Unsloth, TRL), LangChain, Claude / OpenAI / Gemini APIs, Ollama, llama.cpp

Languages & ML: Python, TypeScript, JavaScript, SQL | PyTorch, LightGBM, scikit-learn, reinforcement learning (PPO)

Full stack & cloud: React, Next.js, Tailwind, FastAPI, Node.js/Express, PostgreSQL, Supabase, Firebase, Redis, Docker, GitHub Actions, Vercel, Railway, Playwright

Certifications: OCI 2024 Certified AI Foundations Associate | Supervised Machine Learning: Regression and Classification | SQL for Data Science

Awards & languages: 2nd Place, BrighterIndia Hackathon (2023) | English, Tamil, Hindi, Urdu, Arabic
